### Reason for Retirement:

On May 4, 2010 Honeywell launched the Xenon™ series, the company's sixth generation of hand-held area imaging scanners. Xenon is the first Honeywell scanner to combine two proven technologies, Adaptus® Imaging Technology and Omniplanar's SwiftDecoder® decoding software, to create an industry-leading platform that extends depth of field, shortens read time and improves scanning performance, including faster throughput and processing, on almost all types of bar codes (please refer to PLN 10-04 for more information).

As Xenon combines the class leading attributes of today's existing 2D handheld offerings, Xenon will replace the existing offerings.
